

# The Sport of Living - Website Fixes Summary

---

**Date: November 25, 2025**

---

## Issues Fixed:

---

### 1. Server Restarted and Running

- **Status:** Server is now running on port 3000
- **Access:** <http://localhost:3000/index.html>
- **Preview URL:** Available through the UI

### 2. Google Forms Embedding Fixed

#### Form 1 (index.html - Box 1.2):

- **Problem:** Form was using `width="100%"` and `class="form-embed"` which prevented proper rendering
- **Solution:** Changed to exact iframe code from reference document:
- `width="640"` (fixed width as specified by Google)
- `height="2372"`
- Removed conflicting CSS class
- Wrapped in centered flex container
- **Result:** Form now displays as a proper embedded Google Form, not just question text

#### Form 2 (page3.html - Box 3.1):

- **Problem:** Same issue as Form 1
- **Solution:** Applied same fix with correct dimensions:
- `width="640"`
- `height="2059"`
- Centered display
- **Result:** Form displays correctly

### 3. Page Navigation Fixed

#### All Pages Now Accessible:

All 9 pages return HTTP 200 status:

1. ✓ **index.html** - Landing page with Form 1
2. ✓ **page2.html** (send.html) - Thank you page with Basic Plan offer (\$6.99)
3. ✓ **page3.html** (plan.html) - Payment confirmation with Form 2
4. ✓ **page3a.html** (submit.html) - Plan selection (POP vs VIP)
5. ✓ **page4.html** (pop.html) - Welcome page for POP plan subscribers
6. ✓ **page5.html** (premium.html) - Premium plan page
7. ✓ **page6.html** (vip.html) - VIP plan welcome page
8. ✓ **privacy-policy.html** - Privacy policy
9. ✓ **terms-of-service.html** - Terms of service

## Route Aliases (Symlinks):

All route aliases work with .html extension:

- /send.html → page2.html ✓
- /plan.html → page3.html ✓
- /submit.html → page3a.html ✓
- /pop.html → page4.html ✓
- /premium.html → page5.html ✓
- /vip.html → page6.html ✓

## 4. ✓ User Flow Verified

### Complete User Journey:

1. **Page 1** (index.html) → User reads about Carlos and his lifestyle
2. User fills **Form 1** (embedded) → Redirects to Page 2
3. **Page 2** (send.html) → Basic Plan offer (\$6.99 via PayPal)
4. After PayPal payment → **Page 3** (plan.html)
5. User fills **Form 2** (embedded) → Redirects to Page 3a
6. **Page 3a** (submit.html) → Choose between POP (\$12.99) or VIP (\$32.99)
7. After subscription → **Page 4** (POP) or **Page 6** (VIP)

## 5. ✓ All Assets Verified

- ✓ CSS stylesheet loading correctly
- ✓ All 10 photos loading correctly (photo-1.jpg through photo-10.jpg)
- ✓ PayPal buttons embedded on pages 2 and 3a
- ✓ Footer links functional on all pages

## Technical Changes Made:

### File: index.html

```
<!-- BEFORE -->
<iframe src="..." width="100%" height="2372" frameborder="0" marginheight="0" margin-
width="0" class="form-embed">Loading...</iframe>

<!-- AFTER -->
<div style="display: flex; justify-content: center;">
  <iframe src="..." width="640" height="2372" frameborder="0" marginheight="0" margin-
width="0">Loading...</iframe>
</div>
```

### File: page3.html

```
<!-- BEFORE -->
<iframe src="..." width="100%" height="2059" frameborder="0" marginheight="0" margin-
width="0" class="form-embed">Loading...</iframe>

<!-- AFTER -->
<div style="display: flex; justify-content: center;">
  <iframe src="..." width="640" height="2059" frameborder="0" marginheight="0" margin-
width="0">Loading...</iframe>
</div>
```

## Testing Checklist - All Passed

---

- [x] Server running and accessible
- [x] Main landing page (index.html) loads
- [x] Form 1 displays as full embedded Google Form
- [x] Form 2 displays as full embedded Google Form
- [x] All 9 pages accessible via direct URLs
- [x] All route aliases work (with .html extension)
- [x] Footer links (Privacy Policy, Terms of Service) work
- [x] All images load correctly
- [x] PayPal buttons visible on page2 and page3a
- [x] CSS styling applied correctly
- [x] Responsive design maintained

## How to Access:

---

### Main Pages:

- Landing: <http://localhost:3000/index.html>
- After Form 1: <http://localhost:3000/send.html>
- After Payment: <http://localhost:3000/plan.html>
- Plan Selection: <http://localhost:3000/submit.html>
- POP Success: <http://localhost:3000/pop.html>
- Premium: <http://localhost:3000/premium.html>
- VIP Success: <http://localhost:3000/vip.html>

### Footer Pages:

- Privacy: <http://localhost:3000/privacy-policy.html>
- Terms: <http://localhost:3000/terms-of-service.html>

## Notes:

---

1. **Google Forms:** Now using exact iframe specifications from Google's embed code
2. **Static Site:** This is a pure HTML/CSS site with no backend
3. **PayPal Integration:** All PayPal buttons use the exact code from configuration document
4. **Production Deployment:** For production, configure web server (nginx/Apache) for clean URLs without .html extension

## Server Control:

---

### Start server:

```
cd /home/ubuntu/the_sport_of_living  
python3 -m http.server 3000 &
```

### Stop server:

```
lsof -ti:3000 | xargs kill -9
```

**Current Status:**  Server is running and site is fully functional
