🛠️ Technical Details

Server Information

- **Process ID:** Running on Python HTTP server
- **Port:** 8000
- **Directory:** /home/ubuntu/the_sport_of_living
- **Protocol:** HTTPS (via Abacus.AI preview proxy)

Route Configuration

All route aliases are implemented as symbolic links:

- `send.html` → `page2.html`
- `plan.html` → `page3.html`
- `submit.html` → `page3a.html`
- `pop.html` → `page4.html`
- `premium.html` → `page5.html`
- `vip.html` → `page6.html`

Domain Structure

Both direct file URLs and route aliases work correctly:

- Direct: `/page2.html`
- Alias: `/send` (for user-facing routes)
